

EnduraBol™

CATTLE

Gold standard bolus providing up to 8 months [240 days] supplementation of 6 essential trace elements & 3 vitamins

Features & Benefits:

Single construction, single point erosion technology	Provides a sustained release of 6 trace elements and 3 vitamins for up to 240 days (8 months)
Twin resin coating	Unique design of rigid skin ensures single end erosion. This prevents inconsistent breakdown, providing a consistent supply of nutrients for up to 240 days
Dual boluses	Interacting within the reticulum, initiating bolus breakdown and release of nutrients sustainably
Inert weight	Anchors dual boluses inside the reticulum of the animal to reduce the risk of regurgitation. Once boluses active life ends it completely disperses leaving no residue
Formulated for grazing or forage fed cattle	To help farmers manage the trace element and vitamin status of their herd
Tried & tested bolus technology	Gold standard original manufacturer & inventor of the rumen bolus has over 30 years of research, development and success on farm
Wax protection cap	The cap covers the single point erosion to ensure the bolus doesn't start working until it enters the animal's reticulum
Single application	Reduce unnecessary stress by using our recommended bolus gun, where both boluses can be administered at the same time
Balanced matrix of 6 trace elements & 3 vitamins	High levels of Iodine, Copper, Selenium, Cobalt, Zinc, Manganese as well as Vitamin E, A and D3
Copper, Selenium and Vitamin E	Aids muscle development to support growth and performance as well as overall coat condition
Vital Iodine	Supports a healthy immune system to maximise production and performance potential
Essential Cobalt	Supports the upsurge of Vitamin B12 production to provide extra energy for production and performance
Two source Zinc	Optimises hoofhair and hide health

Suitability:

Cattle with a functional rumen >150kg live weight

Administration:

Two EnduraBol™ Cattle boluses per animal.

Feed Advice:

EnduraBol™ Cattle is a dietetic complementary feedstuff to support the reduction of the risk of nutritional imbalances in grazing and forage fed cattle. Before use it is recommended to seek the advice of your farm nutritionist or veterinarian on the balance of trace elements in the daily ration and the trace element status of your herd.

EnduraBol™ Cattle provides a sustained release of high levels of six trace elements and three vitamins from a unique single point erosion technology giving up to 240 days [8 months] supplementation. Always use a EnduraBol™ approved applicator.

Analysis per kg:

Copper	204,421 mg
Zinc	171,547 mg
Iodine	6,573 mg
Cobalt	2,992 mg
Selenium	3,154 mg
Manganese	105,905 mg
Vit A	7,024,266 iu
Vit D3	1,404,853 iu
Vit E	14,008 iu

Avg. daily supply:

Copper	134.60 mg
Zinc	113.00 mg
Iodine	4.30 mg
Cobalt	2.00mg
Selenium	2.10 mg
Manganese	69.70 mg
Vit A	4,624 iu
Vit D3	925 iu
Vit E	11.50 iu

Unit Size:

20 x 107g Bolus
10 COW SUPPLY
Net Weight: 2.14kg
Code: BOL.RTCABX

Manufactured by:

Data Sheet– EnduraBol Cattle

Presentation

A 107g intraruminal bolus of approximately 70mm x 26.5mm. Containing the following trace elements and vitamins.

Nutritional Additives	Per kg
Copper (Cupric Oxide)	204,421 mg
Zinc (Zinc Oxide)	133,606 mg
Zinc (Zinc Sulphate)	37,941 mg
Manganese (Manganese Sulphate)	105,905 mg
Iodine (Calcium Iodate)	6,573 mg
Selenium (Sodium Selenite)	3,154 mg
Cobalt (Cobalt Carbonate)	2,992 mg
Vitamin A	7,024,266 iu
Vitamin D ₃	1,404,853 iu
Vitamin E	14,008 iu

Uses

A dietetic complementary feed for long term supply of grazing cattle, providing them with a proportion of trace elements and vitamins which are not adequately supplied by grass. The boluses lie in the reticulum at the forward base of the rumen, slowly dissolving from a constant surface area, providing a continuous and sustained supply of trace elements and vitamins to the animal for approximately 8 months.

Before using, it is recommended to seek advice from your nutritionist, animal health advisor or veterinarian, regarding 1) the balance of trace element in your ration and 2) the trace element status of your herd. To avoid any complication caused by over supplementation.

Doses and Administration

Administer two EnduraBol Cattle per animal. EnduraBol Cattle boluses are suitable for cattle over 150kg liveweight.

Load both boluses into the applicator, flat end first ensuring both boluses are securely held in the chamber. Place the applicator into the centre of the cow's mouth, to the back of the tongue into the top of the gullet. Ensuring the cows head and neck is extended and straight. Squeeze the trigger, releasing the boluses. Allow time for the animal to swallow. Remove the applicator carefully. DO NOT use force at any point to avoid damage to the soft tissue or teeth.

Contra-Indications and Warnings

There is no need to supplement with additional Copper, Cobalt or Selenium during the active life of EnduraBol Cattle.

Meat and Milk withholding – Nil

Pharmaceutical Precautions

Do not administer to non-ruminating calves or to cattle weighing less than 150kg.

Store in cool, dry place and out of direct sunlight.

Reseal part used packs.

Do not drop onto hard surfaces.

Keep out of children's reach.

Legal Category

Dietetic complementary feedstuff.

Pack Quantities

Packed in units of 20 boluses, enough for 10 cattle doses.
