

EnduraBol®

PRE-CALVER

Cutting-edge bolus technology, providing up to 4 months [120 days] supplementation of 6 essential trace elements & 3 vitamins ideal for the pre & post calving cow or heifer

Features & Benefits:

Single construction, single point erosion technology	Provides a sustained release of 6 trace elements and 3 vitamins for up to 120 days (4 months)
Twin resin coating	Unique design of rigid skin ensures single end erosion. This prevents inconsistent breakdown, providing a consistent supply of nutrients for up to 120 days
Dual boluses	Interacting within the reticulum, initiating bolus breakdown and release of nutrients sustainably
Inert weight	Anchors dual boluses inside the reticulum of the animal to reduce the risk of regurgitation. Once the active life of the boluses end, they completely disperses leaving no residue
Wax protection cap	The cap covers the single point erosion to ensure the bolus does not start working until it enters the animal's reticulum
Tried & tested bolus technology	Gold standard original manufacturer & inventor of the rumen bolus has over 30 years of research, development and success on farm
Single application	Reduce unnecessary stress by using our recommended bolus gun, where both boluses can be administered at the same time
Specifically formulated for pre and post calving cows	Provides essential trace elements and vitamins to help support hormone production, reduce calving issues and optimises fertility for better conception rates
Balanced matrix of 6 trace elements and 3 vitamins	High levels of Iodine, Copper, Selenium, Cobalt, Zinc, Manganese as well as Vitamin E, A and D3, all help reduce imbalances at times of elevated needs and aids quicker recovery after calving
Supports calf vigour	Provides essential micronutrients to the unborn calf to maximise growth and development and to help support a healthy immune system
Iodine, Selenium and Vit E	Supports a healthy immune system to maximise cow performance and also helps reduce retained cleavings and foetal growth and development
Vitamin D3	Assists with the absorption and utilisation of the body's calcium reserve as well as supporting skeletal development of the unborn calf

Analysis per kg:

Copper	79,100 mg
Zinc	210,500 mg
Iodine	14,300 mg
Cobalt	3,300 mg
Selenium	1,900 mg
Manganese	125,000 mg
Vit A	9,538,900 iu
Vit D3	1,907,800 iu
Vit E	28,900 iu

Avg. daily supply:

Copper	96.90 mg
Zinc	257.90 mg
Iodine	17.60 mg
Cobalt	4.00 mg
Selenium	2.30 mg
Manganese	153.10 mg
Vit A	8,062 iu
Vit D3	1,612 iu
Vit E	20.80 iu

Suitability:

Cattle with a functional rumen >150kg live weight - Ideally 8 weeks pre-calving or anytime during the transition period.

Administration:

Two EnduraBol® Pre-calver boluses per animal.

Feed Advice:

EnduraBol® Pre-Calver is a dietetic complementary feedstuff to support the reduction of the risk of nutritional imbalances in grazing and forage fed cattle. Before use it is recommended to seek the advice of your farm nutritionist or veterinarian on the balance of trace elements in the daily ration and the trace element status of your herd.

EnduraBol® Pre-Calver provides a sustained release of high levels of six trace elements and three vitamins from a unique single point erosion technology giving up to 120 days [4 months] supplementation. Always use a EnduraBol® approved applicator.

Unit Size:

20 x 103g Bolus
10 COW SUPPLY
Net Weight: 2.06kg
Code: BOLENPCBX

Manufactured by:
