

In 2020 Brinicombe took over the worldwide distribution of EnduraBol, used in over 45 million cattle worldwide. EnduraBol is the original bolus, with 30 years of manufacturing experience

While all other brands and types of bolus on the market dispense peak and trough amount of trace mineral, EnduraBol is **the only bolus that delivers exactly the same amount of 6 trace minerals AND 3 VITAMINS, 24 hours a day for 180 or 240 days!**

Brinicombe has commissioned new trails to provide evidence of the remarkable benefits EnduraBol for your herd.

Comparison Weight Gain Trail 2021

Identical beef cattle herd was split into 3 groups, both groups feed high quality commercial feed and supplemented with mineral licks

The Trail

- Starting weights all approximately 450kg
- Farm has known selenium deficiency
- Weights done at Day 0 and Day 85
- **Control** – no bolus
- **Group 1** – EnduraBol High Iodine bolus
- **Group 2** – EnduraBol Cattle bolus

GROUP 1

↑ **16% increase in LWG!**
extra 9.66kg of liveweight gained

↑ **Selenium levels
15% improve!**

↑ **Iodine levels
4% improve!**

The Results

GROUP 2

↑ **10% increase in LWG!**
extra 6.22kg of liveweight gained

↑ **Copper levels
5% improve!**

The Conclusion

If you extrapolate the weight gain over the lifetime duration of the bolus it shows the following:

- High Iodine bolus (180 days) would put on an **additional 20.46kg liveweight**
- Cattle bolus (240 days) would put on an **additional 17.56kg liveweight**
- Using either bolus **improves trace mineral blood levels.**

More trail results coming soon!

NO other product on the market can have such a massive impact on your herd health starting from just 6 cents a day!

Don't delay get EnduraBol in to your herd and reap the huge benefits.
