

Poultry Respite Plus

24 hour respiratory support

Decongestant and expectorant

Supports clear airways by removal of mucus

Contains PST-22 Polysulphide Technology®

As an aid to eliminating harmful bacteria that cause respiration harm

Increases the palatability of drinking water

Avoids the stress of dehydration

brinicombe
poultry 

For respiratory problems in
broilers, breeders and layers

Minimises the effects of stress from:

Handling	Vaccination	Change of feed
Transportation	Medication	De-beaking
Overcrowding	Disease	Infection
Hot conditions	Diarrhoea	Dehydration

Benefits of feeding a liquid:

- Very cost effective
- Guaranteed intake levels
- Keep feeding regime the same
- Easy to administer
- Quick acting = fast results
- No stress

Poultry Respite Plus

24 hour respiratory support

Analysis

Vitamin B1	Vitamin B2	Vitamin B6
125 mg/kg	175 mg/kg	75 mg/kg
Vitamin B12	Biotin	Pantothenic Acid
250 mcg/kg	25 mg/kg	1000 mg/kg
Nicotinic Acid	Folic Acid	
1750 mg/kg	25 mg/kg	

Notes

- Available in: 1 litre bottles
- Minimum treatment periods required due to high concentration of liquid
- It is recommended to use via a "dosatron" pump or other in-line water application
- Store in a cool dry place and avoid direct contact with sunlight
- User must ensure precise mixing and accurate administration

Dosage Guide: 0.1% inclusion - 1000 ml/1000 lts or as per veterinary advice. For maintenance or preventative measures feed for the first 7 days of every calendar month. Use 3 - 4 days before nasal vaccination to enable better inhalation and absorption.

PST - 22 Polysulphide Technology ®

The compounds have the ability to inhibit bacteria that could potentially develop antimicrobial resistance.

Source of biotin

Aids the prevention of leg and beak abnormalities, leg weakness and hock disorders.

Folic acid

Stimulates haemoglobin production which helps reduce bruising in white meat. Also improves hatchability and the viability of chicks.

Vitamin B complex and nicotinic acid

Maintains a healthy nervous system – helping to keep stress to minimum. Helps support liver and energy production to optimise energy conversion. Aids the prevention of embryo and post hatch mortality.

Pantothenic acid

Supports growth and maintains production in stressful environments. Required for optimum egg production and hatchability.
