**Aqua** **ECTO**GON-284<sup>®</sup>

Nature's most powerful  
bacteria & parasite treatment

An Intellectual & Patent by  denis brinicombe  
group

Asia Marketing & Distribution  Tallahesse

# WHAT IS ECTOGON-284<sup>®</sup>

In 2002 the Denis Brinicombe Group embarked on a mission to realise the benefits that micronutrition could have on animal health to help reduce the use of chemicals and antibiotics in the environment.

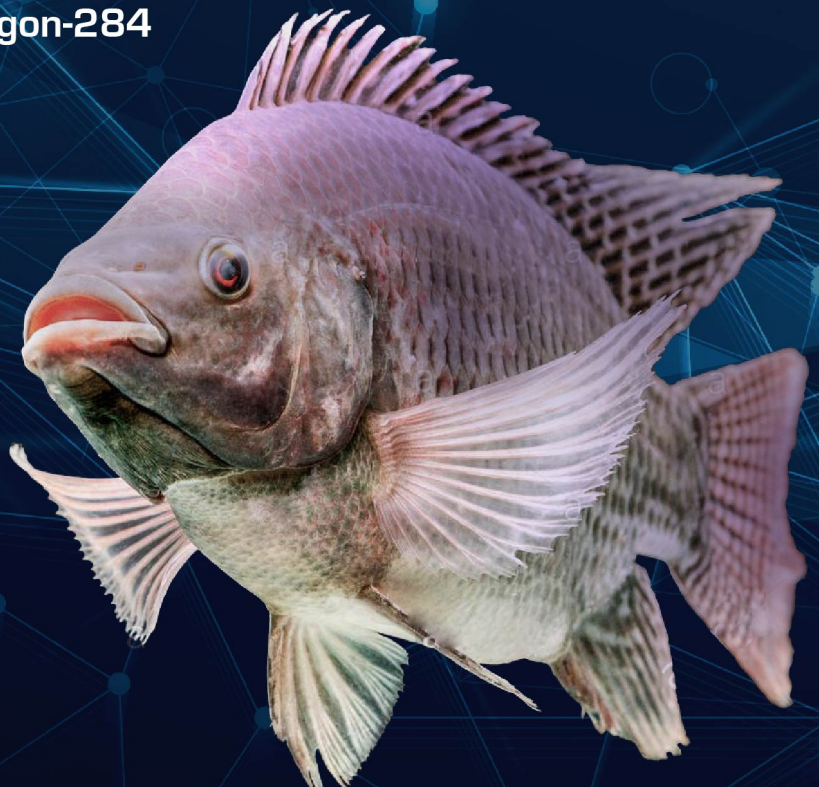

Through continued research and development, the true potential of the diallyl polysulphide family has been established and today is incorporated into our patented PST22 technology.

Polysulfides are extremely powerful, but only if they can be isolated, captured, stabilised and produced consistently with every batch. PST-22 is a naturally derived product with patented production technology that is brand new to the animal health/feed industry.

Long term benefits of continued use throughout the life of aquatic animal of Aqua Ectogon-284

- Disrupt parasite life cycle
- Stops spreading infectious disease through skin lesion
- Decrease of mortality, increase yield

# Aqua ECTOGON-284<sup>®</sup>

Aqua Ectogon-284 has been scientifically formulated to target parasites. Available in both liquid & powder form.

## PARASITE TREATMENT

Powerful repellent works through the dermis & epidermis to stimulate an adverse reaction of the sensory receptor of the parasite.

## RECOMMENDED DOSAGE

SPECIES	DOSAGE g/kg of Feed	
	 LIQUID 1-2	 POWDER 2-4

**A 100% natural feed premix to help reduce the use of antibiotics, pesticides & chemicals**

**Contains PST-22 Polysulphide Technology®**

**Non species-specific protection. Suitable for all freshwater & marine aquaculture species**

**100% no withdrawal period or treatment resistant**

**Ectogon-284 has shown to drastically decrease mortality & to improve the feed conversion ratio & increase daily weight gain**

**Active ingredients:**

**PST-22, Acetic Acid, Seaweed Meal, Zinc & Methionine.**

**For each kg of mash/pellet feed, mix the recommended dosage of Ectogon-284 Powder/Liquid with 20ml oil.**

**Let it dry for at least 20minutes.**

**Avoid exposure to direct sunlight and high temperature.**

**Store in cool dark environment.**

**Reseal bag/bottle after using.**

**SHAKE WELL BEFORE USE**
