

EnduraBol®

BIOTIN

Cutting-edge bolus technology, providing up to 4 months [120 days] supplementation of 6 essential trace elements & 3 vitamins as well as the targeted 20mg per day of Biotin

Features & Benefits:

Single construction, single point erosion technology	Provides a sustained release of 6 trace elements and 3 vitamins for up to 120 days (4 months)
Twin resin coating	Unique design of rigid skin ensures single end erosion. This prevents inconsistent breakdown, providing a consistent supply of nutrients for up to 120 days
Dual boluses	Interacting within the reticulum, initiating bolus breakdown and release of nutrients sustainably
Inert weight	Anchors dual boluses inside the reticulum of the animal to reduce the risk of regurgitation. Once the active life of the boluses end, they completely disperses leaving no residue
Wax protection cap	The cap covers the single point erosion to ensure the bolus does not start working until it enters the animals reticulum
Tried & tested bolus technology	Gold standard original manufacturer & inventor of the rumen bolus has over 30 years of research, development and success on farm
Single application	Reduce unnecessary stress by using our recommended bolus gun, where both boluses can be administered at the same time
Balanced matrix of 6 trace elements & 3 vitamins	Good levels of Iodine, Copper, Selenium, Cobalt, Zinc, Manganese as well as Vitamin E, A and D3 reduces the risk of nutritional imbalances in grazing and forage fed cattle
Biotin, copper, zinc, vitamins A and D3	Help reduce lameness issues by optimising the health of the hoof structure. Biotin is essential for keratinisation, a key process in the composition of the hoof horn. Studies have shown cows that were supplemented with Biotin at 20mg/day for a long period of time had better locomotion scores
Supports high milk yields	Research has shown that supplementing 20mg/day of Biotin to high yielding, early lactation cows is required to maintain their peak milk yields

Suitability:

Cattle with a functional rumen >150kg live weight when additional Biotin is required.

Administration:

Two EnduraBol® Biotin boluses per animal.

Feed Advice:

EnduraBol® Biotin is a dietetic complementary feedstuff to support the reduction of the risk of nutritional imbalances in grazing and forage fed cattle. Before use it is recommended to seek the advice of your farm nutritionist or veterinarian on the balance of trace elements in the daily ration and the trace element status of your herd.

EnduraBol® Biotin provides a sustained release of high levels of six trace elements and three vitamins from a unique single point erosion technology giving up to 120 days [4 months] supplementation. Always use a EnduraBol® approved applicator.

Analysis per kg:

Copper	79,100 mg
Zinc	210,400 mg
Iodine	14,300 mg
Cobalt	3,300 mg
Selenium	2,000 mg
Manganese	125,000 mg
Vit A	9,532,400 iu
Vit D3	1,906,500 iu
Vit E	28,900 iu
Biotin	16,220 mg

Avg. daily supply:

Copper	96.90 mg
Zinc	257.70 mg
Iodine	17.60 mg
Cobalt	4.00 mg
Selenium	2.40 mg
Manganese	153.10 mg
Vit A	8,057 iu
Vit D3	1,612 iu
Vit E	19.60 iu
Biotin	20.00 mg

Unit Size:

20 x 103g Bolus
10 COW SUPPLY
Net Weight: 2.06kg
Code: 66-00016

Manufactured by:

RUMBOL
