

EnduraBol®

ORGANIC

Cutting-edge bolus technology, providing up to 6 months [180 days] supplementation of 6 essential trace elements

Features & Benefits:

Single construction, single point erosion technology	Provides a sustained release of 6 trace elements for up to 180 days (6 months)
Twin resin coating	Unique design of rigid skin ensures single end erosion. This prevents inconsistent breakdown, providing a consistent supply of nutrients for up to 180 days
Dual boluses	Interacting within the reticulum, initiating bolus breakdown and release of nutrients sustainably
Inert weight	Anchors dual boluses inside the reticulum of the animal to reduce the risk of regurgitation. Once the active life of the boluses end, they completely disperses leaving no residue
Wax protection cap	The cap covers the single point erosion to ensure the bolus doesn't start working until it enters the animals reticulum
Tried & tested bolus technology	Gold standard original manufacturer & inventor of the rumen bolus has over 30 years of research, development and success on farm
Single application	Reduce unnecessary stress by using our recommended bolus gun, where both boluses can be administered at the same time
Formulated for grazing and forage fed cattle	To help farmers manage the trace element status of their herd
Balanced matrix of 6 trace elements	High levels of Iodine, Copper, Selenium, Cobalt, Zinc, Manganese to help balance potential deficiencies
Copper and Selenium	Aids muscle development to support growth and performance
Selenium and Iodine	Increases bioavailability to support a healthy immune system and antioxidant function to maximise production and performance potential
Essential Cobalt	Supports the upsurge of Vitamin B12 production to provide extra energy to maximise growth and development
Two source Zinc	Optimises hoof, hair and hide

Suitability:

Cattle with a functional rumen >150kg live weight

Administration:

Two EnduraBol® Organic boluses per animal.

Feed Advice:

EnduraBol® Organic is a dietetic complementary feedstuff that helps reduce the reduction of the risk of nutritional imbalances in grazing and forage fed cattle. Before use it is recommended to seek the advice of your farm nutritionist or veterinarian on the balance of trace elements in the daily ration and the trace element status of your organic herd.

EnduraBol® Organic provides a sustained release of high levels of six trace elements from a unique single point erosion technology giving approximately 180 days of organic approved supplementation. Approved for use in Organic systems by OF&G.

Analysis per kg:

Copper	214,200 mg
Zinc	179,700 mg
Iodine	6,900 mg
Cobalt	3,100 mg
Selenium	3,300 mg
Manganese	111,000 mg

Avg. daily supply:

Copper	195.20 mg
Zinc	163.70mg
Iodine	6.30 mg
Cobalt	2.90 mg
Selenium	3.00 mg
Manganese	101.10 mg

Unit Size:

20 x 111g Bolus
10 COW SUPPLY
Net Weight: 2.22kg
Code: BOL.ENOGBX

Manufactured by:
